Cleveland, O., May 15.—[Special.]
—Every story by survivor or witness acreves to show the rapidity with which explosion and fire swept the Cleveland clinic.

So sudden and merciless was the blast of gas and flame that those who were caught within the walls of the clinic had little chance for their lives. Most of those who escaped flung themale rapives from windows.

First arrivals at the scene saw panic stricken faces appear in the windows.

A moment later they disappeared as smoke and fire swelled from within. Piled on the floor at the doors and along the stairways the rescuers found those who strove to crawl to the air outside.

enjoy a Henrici luncheon today

Though at times it may seem that things on all sides are being done in slipshod ways, always there are those who work in patient, conscientious effort to accomplish an approximation of perfection.

* * *

Ideals still lure some men on to effort beyond the ambition of those who find tangible profit the full and only reward of endeavor.

* * *

Included within the select circle are those whose appreciation furnishes inspiration that sustains when, as sometimes happens, the things which the world most regards as evidences of success are denied.

* * *

But monetary rewards are not always withheld. Many a fine old business, which has flown the flag excelsior above its portals has won leadership of a kind which even avarice appraises very highly.

☆ ☆ ☆

As an organization coming down through most of the last half of the last century and more than the first quarter of this with ever increasing patronage Henrici's knows the double reward of successful adherence to high aims.

☆ ☆ ☆

Would you know why Henrici's doorway is filled by those who have the most intelligent appreciation of quality food and its proper service? You have only to come for breakfast, luncheon, dinner or late supper and see with what unmistakably superior skill things are done in Henrici's as contrasted with the ways they are done elsewhere. OW THAT THE FOOT OF THE RAINBOW LIES AT YOUR FEET ~

HOSE were fabulous dreams you dreamed as a boy, about the tabulous toot of the rainbow. You'd find fortune there, and all the things that fortune can buy: 2 beautiful home, a swift, trim yacht, the

Now, after years of struggle, you've won your way to success—the foot of the rainbow lies at your feet. Already you own a beautiful home and a yacht. But you've wavered on the other dream . . . that finest car in the world - Rolls - Royce.

It isn't a question of money. You've probably spent more for automobiles in the last ten years than a Rolls-Royce that will last for twenty years costs. And it isn't a question of desire. You want 2 Rolls-Royce now more than ever. But you hesitate to buy one, because - "My friends might talk."

Think again about that! Did your friends criticize you when you added those extra acres to your estate, to gain privacy; or when you took a suite on the ocean liner, to gain more comfort? Did they criticize you when you moved your offices to a taller building, to insure greater quiet; or when you bought those government bonds as a sound investment?

Then should your friends challenge your purchase of a car that offers all these things - privacy, comfort, quiet, the soundest investment in the fine

But perhaps you did not realize that Rolls-Royce offers so much. Perhaps you thought of it as a luxury-when actually it is one of the best protections to health and nerves and efficiency that

a business man can buy. For Rolls-Royce is the quietest car ever built-a car that has banished even those tiny quavers which, though seldom heard, fray your nerves and wear you down. A Rolls-Royce is as comfortable as your favorite chair. It has less vibration than your

yacht. You can't feel the motor going-you have to strain your ears to hear it.

Think what such peace and quiet would mean to you at the end of each noisy, work-wearied day! You step into the car at your office doorit's like stepping directly into your library at home. The roar of the city is stilled to a distant whisper. You forget business cares - you are conscious only of a great restfulness, cradling your body, soothing your nerves. As you float home, you shed your weariness like a coat.

Yet Rolls-Royce can wake you up as easily as it lulls you to rest. Just take the wheel - and drive! Thrills? Rolls-Royce will give them to you!

Irolleur Section

And this car is safe! No mechanical part on which the safety of the occupants depends has ever failed in a Rolls-Royce. It commands lower collision rates than any other car.

Such is Rolls-Royce, the car you've dreamed for years of owning - a car that is more than worthy of your dreams . . . Now, reach for your telephone and let your dream come true!

Dwight Anderson is assistant di-ector in charge of the Chicago offices

of the department. Victor Michels is superintendent of registration, with superintendent of registration, with offices in Springfield.

The Tribune reporter who investigated a number of the medical fakers calling themselves "men's specialists," this morning in his report tells of his experience in the offices of the notorious Old Docs Whitney and Lawhon. Drs. Whitney and Lawhon have long been known to the American Medical association and other agencies which keep records of the charlatans in the medical profession. These two Old Docs have been exposed several times by The Tribune. But they have always crept back into their practices again.

ood that these two fakers could not be ept down. Here is what the reporter as to say of his visit to their offices:

Washington, D. C., May 15.—[Special.]—Despite setbacks in the senate, President Hoover seemed today to be likely to obtain farm relief legislation in substantial accord with his recommendations.

The house tomorrow plans to assert its rights as the only branch of congress which may originate a measure affecting the revenues. Speaker Longworth, Representative B. H. Snell [Rep., N. Y.], chairman of the rules committee, and other house leaders insisted today that the senate invaded the prerogatives of the house when it added the export debenture provision, which affects tariff revenues, to the farm relief bill.

The New this is the excuse for nonenforcement of the law, said Senator La Follette. "But it will not hold water. It might be that ships manned with the prescribed crews would make a little less profit, but they would be far safer for passengers and crews. If the President means what he says about law enforcement, I do not see how he can refuse to enforce the seamen, would make it impossible for American ships to compete profitably with foreign ships. The result would be to drive American ships to compete profitably with foreign ships. The result would be to drive American ships to foreign flags.

No other brakes so powerful and positive in action Minimum of pedal pressure required to operate An invaluable safety factor found only in Cadillac-LaSalle

In any traffic emergency no other brakes offer so great an assurance of safety as the Cadillac-La Salle Duplex Mechanical Four-Wheel Brakes.

These brakes are a revelation in fast, sure and effortless responsiveness under all driving conditions. No other car can possibly give you this braking system because it is protected by basic

The Cadillac or La Salle owner has better control of his car than any other driver. With his Duplex-Mechanical Four-Wheel Brakes, he can bring his car to a remarkably easy stop in the shortest possible space with slight pressure on the brake

A thorough examination would reveal also that when the brake pedal is released there is never any tendency to drag-the cause of much needless friction and wear in cars not so equipped.

Another Cadillac-La Salle protective measure that cannot be ignored is the quick, quiet, clashless Syncro-Mesh Silent-Shift Transmission. This, too, is protected by basic patents, so that you are afforded this protection only in Cadillac and La Salle.

With this transmission you can actually shift gears at any speed without the slightest hesitancy. With your finger tips you make just one gentle movement from gear to gear

with the lever. There is never the slightest suggestion of clashing gears. The operation is positively silent.

Still another Cadillac-La Salle factor of safety is the equipment of all windows. doors and windshields with non-shatterable Security-Plate Glass. Here is protection from flying glass fragments with which no one (parents in particular) can afford to dispense.

These safety factors are standard equipment in all Cadillac-La Salle cars and are offered with no extra charge whatever.

Consider the delivered price as well as the list price when comparing automobile values. Cadillac-La Salle delivered prices include only reasonable charges for delivery and financing.

LA SALLE - \$2295 - La Salle is just as easy to purchase as many cars of far less value and far less prestige. And it is far more economical to operate. It is priced from \$2295 to \$2875. Cadillac \$3295 to \$3995. All prices f. o. b. Detroit. General Motors Deferred Payment Plan enables you to enjoy your Cadillac or La Salle at once and pay out of income.

OUTSTANDING ADVANTAGES

ALL THE MECHANISM IS ON TOP

OF the many advan-tages of General Electric Refrigerators, two are especially vitalthe hermetically sealed,

THE

CABINET IS

on-top mechanism and the all-steel warpproof cabinet.

The mechanism in any electric refrigerator has but one purpose-to absorb heat from the food. It must be permitted to radiate that heat rapidly just as heat is conducted away from the engine of your car. As heat naturally rises, it can be radiated from the top of the refrigerator. To place the radiating coils anywhere else cuts down their efficiency and increases the cost of operation.

Mounted on top, away from dust and difficulties, permanently oiled and hermetically

sealed, this arrangement of the mechanism leaves maximum space available within the cabinet for food storage.

And now has been added the new all-steel cabinet. Built like a safe, it can't warpit operates on the least amount of current -its doors always retain their perfect fit which shuts out heat. In six sizes at prices surprisingly low. The small family size is but \$215, at the factory. Come in and see them and let us tell you our plan of conveniently spaced payments.

"The state should interest itself in
education, but the state is not made
to absorb and annihilate the family,"
said the pope. "It would be absurd
and against nature, for the family
comes before society and before the state. The state should perfect the activities of the family in full corwith the desires of the father and mother and it should respect especially the divine right of the church in education."

Are Not Intractable. The pontiff continued, saying, "We annot admit that in its educational ac-

ucation. On this point we are not erely intractable but we are uncompromising. We are uncompromis-ing just as we would be in answer to the question if asked how much does two plus two make. Two plus two makes four, and it is not our fault if it does not make five or six

Smokeless and Sootless — DUSTLESS
Chicago Solvay Coke is in step with modern
housekeeping. Few ashes for you to bother
with. No black smoke to pour out of your
chimney. No soot to mar the cleanliness of
your home. No dust or grime will settle on
your woodwork, walls, rugs or curtains.

At today's bargain price DUSTLESS Chicago Solvay Coke offers you every advantage. The producer and the dealer must advance the price from month to month to cover the cost of storage and rehandling. It's a simple question of whether you let your own bin stand idle and pay a monthly storage charge on the fuel you must have next winter, or fill your bin now and get a return from an otherwise idle basement.

Make your fuel bin pay rent

Abolish useless drudgery by heating your home next fall and all next winter with a manufactured fuel free from impurities. No bone, no slate finds its way into DUSTLESS Chicago Solvay Coke.

Modern housekeeping and modern living demand a clean, DUSTLESS fuel.

Order your supply now, before the first advance in price. Save on your heating costs, save on your cleaning bills, save yourself time and money burning a smokeless—sootless and DUSTLESS fuel.

Regardless of Price

Government figures show the gain of Lucky Strike to be greater than the combined increase of all other cigarettes. The public will be served and this is proof, indeed, that regardless of price, you actually get more in Lucky Strike than any other cigarette can offer. Its perfect blend of fine tobaccos gives pure smoking delight. Its exclusive, secret toasting process guarantees the tobaccos free from irritants and impurities and, in the opinion of 20,679* physicians, makes Lucky Strike less irritating than other cigarettes.

The figures quoted have been checked and certified to by LYBRAND, ROSS BROS. AND MONTGOM-ERY, Accountants and

What is the Future of Borin-Vivitone Corporation?

THE Assets of this Company, in seven years, have grown from an original capital of \$700 to a total of over \$2,000,000 -a remarkable record. The future prospects, however, appear equally bright on account of three new factors: -

First -The decoration of the home is becoming more and more important to the American people - more interest, more artistic care and more money is being spent for this purpose. Therefore, a larger market for those companies manufacturing household furnishings.

Second - The Company has recently increased its line and the profits from the new articles manufactured are expected to show a very substantial increase over the profits of the regular

Third-The Company is now in a very comfortable financial position, so that future expansion is provided for.

We have prepared an analysis of the present situation of this Company which we will be glad to furnish upon request without obligation.

Good values may be had in today's bond market—the general level of prices is now at its lowest point since November, 1926; equities back of the bonds have been materially strengthened in numerous cases by the recent extensive stock financing. The present attractiveness of good bonds is emphasized by contrast with the market position of many junior issues. For example, taking the first 25 common stocks quoted on the New York Stock Exchange, of companies baving both first mortgage bonds and common stocks outstanding, the interesting fact is disclosed that, despite the junior position of the stocks, their yield as of March 21, was actually almost 1½% less than that of the first mortgage bonds of the same companies.

(From Halvey, Stuart & Co. advertisement April 11, 1929.)

A good time to buy bonds

Yields of public utility bonds, as typified by a representative group, after showing a downward trend since 1920, reversed themselves in the third quarter of last year and

are now higher than the general average during two years preceding.

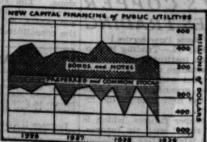

The resulting advantage to the investor may be seen by contrasting the price recession with the steadily strengthening position of the industry. It is obviously a reflection of the abnormal situation prevailing recently in the money and speculative market. The consumption of both electricity and

gas increased in 1928 over 1927, the former by 10%. The outlook for continued growth may be seen in the ever-expanding domestic uses, and the pronounced increase in industrial uses for electricity and gas.

A gratifying increase in effi-cience is indicated by the steady growth in net earnings. The net revenue of ninety-five public util-ity organizations of the country increased almost 11% in 1928 over the preceding year, compared with a 4% increase in gross. One of the important factors contributing to this is the continued trend towards consolidation with its resultant economies and improvement in service.

Another factor working to the advantage of the bond investor is the recent increase in stock equities in the utilities. As shown by the accompanying chart, the public utility companies of the country de-rived 29% of their new capital from

the sale of stock in 1926, 38% in 1927, and over 43% in 1928. The addition of this large amount of equity obviously strengthens the position of the senior securities.

Insurance companies, known for their conservatism, are buying utility securities in increasing volume and individual bond buyers are showing a well sustained preference for them. This demand, in view of their restricted current output, is giving utility bonds a scarcity value, which, added to the other factors, points to the present level of prices as an outstanding opportunity. A first of current offerings will be sent upon request -

MARIJEACTURERS: do you know your geography?

THIS is not the map you learned at school ... but Lit's a map from which the manufacturer of today can learn a profitable lesson in economical distribution.

It shows clearly that markets should be measured in terms of people rather than political boundaries. . . It points definitely to the economic necessity of locating the industrial plant at the natural center of distribution . . . at a point from which all markets can be reached most promptly, with best service and at least cost.

Proven Center of American Markets

After moving gradually southwest, the distribution center of America has found a location of continued stability in which Louisville is the logical hub. Manufacturers recognizing this trend and the advisability of centralized plant location are today producing and distributing their finished products at savings of from twelve to twenty per cent.

> Over 50 Million People Within 500 Miles

Half the population east of the Rockies lives, works and spends its money within a radius of 500 miles of Louisville. And Louisville is the only large city combining low-cost accessibility to this rich market with the low-cost production advantages south of the Ohio.

> Be Sure to Get the Louisville Story

Send for book, "LOUISVILLE-Center of American Markets", containing definite facts about Louisville as the ideal manufacturing center for distribution to all markets. Specific questions will be answered specifically—a survey pertinent to your particular requirements will be prepared at your request without obligation and in confidence.

PRIMARY GRAIN MOVEMENT

Kegaining our Place on the Seas

SINCE the World War the United States Govern-ment has accomplished a tremendous task in restoring our flag to the seas. It has established shipping routes. It has employed a great number of agents in all parts of the world. It has completed much of the development work necessary in the building of a huge enterprise.

And now by the passage of the Merchant Marine Act of 1928, the Government has provided the basis for intensive development of the American Merchant Marine under private ownership. For the first time since clipper ship days, our Merchant Marine can compete with foreign shipping on a favorable basis. United States Lines, Inc., operating a fleet of eleven vessels in the North Atlantic service, in-

cluding the great Leviathan, is in position to take advantage of these favorable conditions. The earnings per year of the United States Lines, Inc., under private ownership, available for dividends and Federal Income Taxes, are estimated by qualified marine authorities at \$2,500,000 or approximately \$4.00 per Preference share. Unbroken Growth . . . A Steady Upward Trend is the record of the utility industry

During 1921, when the most serious business depression in fifty years occurred, when the volume of manufacture declined 32%, the electric light and power industry not only showed no loss but actually made a gain.

"Yed We outhwest, the distrithe only large city come specification of the rich man

The public utility industry serves and receives revenue from almost every industry, every business and every home in practically every community of 1,000 population or over.

Even in any one city-unless it is a one-industry community-the active industries at any given time offset the less active ones.

The use of electricity in the average home is still for the most part on a minimum-necessity basis and can scarcely be reduced in less prosperous times.

Since 19\$3 the sale of manufactured gas has increased 160% and the number of customers nearly 80%.

The public utility industry is in its period of rapid growth. Additional uses and needs for its services are constantly arising.

The General Gas and Electric Corporation has large holdings in widely diversified utility enterprises. Its operating properties serve the prosperous citrus growing area of Florida and the rapidly developing industrial area of South Carolina centering at Columbia where a development on the Saluda River is being constructed which will have the largest artificial lake in the world for hydro electric power.

The unbending stability coupled with the steady upward trend of the industry offers an unparalleled investment opportunity.

NVESTMENT TRUST SHARES

solve the problem of investing funds profitably and safely

TEXT to conservative bonds, the shares of highgrade investment trusts merit purchase at this time. No other type of security solves more satisfactorily the problem of investing funds advantageously in an uncertain market.

These shares present new opportunities to obtain a wide participation in the increasing earnings and growing asset values of the nation's leading industries.

The funds of investment trusts—as established by men of outstanding ability and unquestioned integrity—are broadly distributed over a carefully-selected, constantly supervised group of securities of known value. Such trusts-in their various forms-offer investors their choice of varying degrees of safety and speculative opportunity. They embody not only the time tried principles of the British type but also the extensive experience of our large, successful insurance institutions and the broad knowledge of American security experts and economists.

From the stand-point of possibilities of appreciation in value as well as yield, investment trust securities compare favorably with the highest class of investment stocks.

We shall be glad to submit specific recommendations of a number of attractive Investment Trust Shares.

CENTRAL HANOVER

Unites Central Union Trust Company

\$600,000,000 and capital funds of over \$100,000,000 Central Hanover Bank and Trust Company merges two old, independent and conservative New York financial institutions with a history dating back to 1851. The main office will be in the new and recently rebuilt quarters of Central Union Trust Company at 70 Broadway and 13 other offices will make the complete facilities of Central Hanover Bank and Trust Company available at 13 other Manhattan business centers.

Company brings together two groups of widely experienced and carefully trained officers whose traditional policy of direct dealing with customers assures

Its large banking business as well as the volume and quality of its trust business have been notable characteristics of the Central Union Trust Company. Hanover National Bank has been eminently a bankers' bank. Central Hanover Bank and Trust Company therefore has unusual facilities and organization for a completely rounded This merger will not affect the MARIO traditional investment policy of both institutions.

The Central Hanover Bank and Callette Trust Company will have no securities for sale nor will it have any affiliation with security or investment corporations.

Therefore the independence of the merged companies in the selection of investments for its trust funds and for individuals will be maintained and perpetuated.

Central Hanover Bank and Trust Company will continue the policy of having foreign representatives rather than branches in foreign countries, cooperating with local banks, rather than competing with them. This has been largely re-sponsible for the highly satisfactory service of the foreign departments in expediting and financing foreign business, export and import.

The presidents of both institutions MOMDAGE head the official staff of Central Hanover. George W. Davison is president and William Woodward is chairman of the board.

ROTICE TO OWNERS OF ALEMITE-EQUIPPED CARS

To Be Sure Genuine Alemite Lubricants—Lubricants Made Specially for Use in Alemite High Pressure Lubricating Systems Are Used in Your Car

Go to the Alemite-ing Stations Listed Below. Look for the Yellow Sign

Owners of cars, equipped with the Alemite High Pressure Lubricating Systems, frequently ask whether or not a special type of lubricant is required in those systems.

The answer is, "yes." All greases are not fitted to the Alemite Systems. The use of unknown, inferior greases, frequently found in haphazard "Greasing Stations" claiming "High Pressure Lubrication," is seriously urged against.

Even systematic "greasing" of that nature, based on mileage, is not PROPER LUBRICATION. Nor is it insurance against the Improper Lubrication to which 80% of all repair bills are traced by authorities.

Simple Protection Now

For your own protection, the obviously sensible thing is to go direct to a genuine Alemite-ing Station for lubrication service. To have your car Alemited; not "greased."

These stations, listed below, identified by the Yellow Sign shown here, use special Alemite Lubricants. Lubricants developed by the makers of the Alemite Systems themselves, after years of research, as CORRECT for those systems. Lubricants that NEVER VARY in quality.

Efficient mechanics serve you at these stations. You get the ultimate in scientific lubrication to protect your car's life; to give you smoother operation and amazingly fewer repair bills.

What Alemite-ing Consists Of

1. BEARINGS: Alemite High Pressure Lubricant forced into every vital chassis bearing with Alemite equipment by expert Alemite mechanics-every 500 miles.

How To Increase the Trade-In Value of Your Car

Alemite High Pressure Lubricating Systems together with Alemite Lubricants especially designed for the most efficient results in these systems, lengthens car life and largely eliminate 80% of all repair bills. Car manu-

facturers recognize this—so more than 95% of today's cars are equipped with Alemite. A properly lubricated automobile means a long-lived

automobile—one that naturally commands a higher So Alemite now offers Recorded Alemite Service a certified record of all the lubrication service performed on

your car. A record that "pedigrees" it and will increase the re-sale value of your car 10% or more. The dealers whose names appear in this advertisement offer genuine Alemite-ing with genuine Alemite Lubricants. Ask them about the new R. A. S.-Recorded

2. GEARS: Differential and transmission thoroughly flushed

cant forced in-every 2,500 miles. 3. SPRINGS: Springs sprayed with a special Alemite Graphite Penetrating Oil-every 500 miles. Eliminating ALL spring

out by a special Alemite process. New Alemite Gear Lubri-

squeaks and making the car run immeasurably smoother.

Just drive your car to one of the stations listed below and try this service. You will notice an immediate difference in the way your car runs.

Specially Designed Equipment for Alemite-ing

Now you can be sure. Watch the work yourself. Not a bearing will be missed. And the work will be done in just a few minutes with latest type super-machines. Most of the Alemite dealers listed below use this type of equipment:

1-Alemite Guns (typical example at right)

Special Alemite high pressure guns are used. Guns that produce pressures of thousands of pounds per square inch, and will force fresh, clean lubricant into the chassis bearings, re-

placing the old grit and grease. Work done in a few minutes' times.

2—Alemite Gear Flusher (left)

This type of machine washes out the transmission and differential with a strong, forceful stream of distillate. The electric motor gives sufficient force to clean out the metal filings and other foreign matter.

3—Alemite Spring Sprayer

This spray operates by compressed air and forces Alemite graphite penetrating oil between each leaf of the spring. It is also used for taking out squeaks located in the body of the car. The oil evaporates and leaves a dry film of graphite. No more collection of road dust, because we do not use cheap crank case oil.

In having your car lubricated insist on genuine Alemite lubricants. These lubricants cost the dealers more money—but costs you no more than ordinary greasing.

"My dear, you're no dowager!"

"No. But . . . that frock reminds me a little bit too much of mether I had, once."

"Ah, one of these sacred frocks," said Geoffrey, teasily.

"It was before you were born," sighed his mother, with one of her rare fashes of naturalness. He wondered for whom she had worn the sacred frock, and turned to a fresh page.

"Personally I'd like to see you in this—"

Mother and son discussed the fashion drawings until Mrs. Ford had barely two hours for her bath and careful tollet before lunching with her favorite enemy. That Morning Post, still unfolded, went away with her breakfast tray into the kitchen to the face of countless other papers.

Thus it was that the Fords had missed the notice of news that by chance they were not to hear for some days after this lazy Riverside afternoon of Geoffrey's musings.

Under the guidance of its new director, Sigfrid Prager of Madison, Wis, it presented much the same sort of program that Mr. Boeppler during his three years of incumbency had been in the habit of preparing, chorales, cantatas, choruses, with and without soloists, and with an occasional incursion into a bit of Bach's orchestral music. There was special fitness in setting aside "Gottes Beit Ist die Allerbeste Zeit" to Mr. Boeppler's memory, since Bach wrote it as a memorial, and this in spite of the fact that the audience was requested not to applaud, but did so anyway. It is one of Bach's most eloquent and touching compositions, and one wherein conductor and singers came into close contact with the spiritual sense of the work.

Tired of Yourself? New Colors, Perfume Will Revamp You

BY ANTOINETTE DONNELLY. Whether perfume expresses the perthan color is an argument obviously engrossing the attention of one part of the world. We read that "frocks impregnated with an 'indelible' per-fume" are the newest vogue in clothes in London's smart set.

It's prohably like a lot of other things you hear about the smart set of which they themselves are bliss-

We are told the query is what perfume suits one best rather than what color is best. But when we read on that if the scent that suits the personality best is chosen, a women need not worry much about the shade of her dress, we wonder if that isn't carrying perfume propaganda a bit far. What is to prevent worrying about getting the right color along with the right perfume?

However, perfume using and choosing has been lifted into the fine arts. It always was looked upon as an art,

It always was looked upon as an art, in a way, but not so finely worked a one as it has come to be of recent days. ensemble still dominates the street scene of style. The old stage trick of combining a printed one piece frock with a plain coat lined with the print receives as much applause now as it ever did. Today we have chosen a model of Patou to illustrate the charm of this vogue. Here the print is white on a red ground and the coat of plain crêpella, which may be either red or black, is lined with the frock material. Interesting lines are achieved in this costume. The coat is decorated with seaming in step effect on the sleeves and with fine tucks on the collar. Plaits, which constitute not only fullness, but raised waistline, are also atranged in step formation. The frock gains modeling and chic by inset bands of plain crêpe. Fine white organdy fushions its charming collar and the three tiered, flat jabot. A novelty straw hat with a long brim on one side only, and braided leather shoes add the finishing details of smartness.

MAYONNAISE

BY DORIS BLAKE. BY DORIS BLAKE.

And still they keep on asking whether they should let the young man put his arm around them the first time they're out with him, whether he should be permitted hand holding privileges and kissing, and so on. And if not, why not? And does it make a girl more popular, or does it hurt her reputation?

And still we poor elders flounder round in the uncertainty of being judged too old fashloned for anything but the shelf if we stress the handsoff policy too hard, or too indulgently weak-kneed if we haven't the courage to stick to our guns.

Yes, times have changed since Doris was a gal. But until she is more con-vinced than she is at the present moment that men aren't the same old tyrants, gossips, prudes, and censors about their preferred women's conduct she's going to keep the knees strength-ened for her stand on conduct for girls. Fineness is all she pleads for. Cheapness is what she crys against.
And she'll leave it to the young
women themselves to figure out
wherein may be found the dividing

fine.
You young women are fairly wise—
toot as wise, of course, as you will be
ten or twenty years hence. You are
biessed with a feeling of self-respect,
and I may assume you have manners
and taste becoming your age. There
are certain girls you admire a great
deal and others whom your own instinct warns you to hold aloof from.
You do not want to be classed with
cirls who are cheap, do you? Well. girls who are cheap, do you? Well, there are your patterns. Cut your own style.

I don't think a girl is bad or even vaguely loose because she kisses and pets when she is pressed so to do. But I do think she is tagging herself as cheap. And once you get that tag tied to you by either the boys you know or the girls, try and sell yourself as a nice, fresh, wholes panion. It can't be done.

Besides, you don't have to go in for at sort of thing to have a good You don't have to be prudish. You don't have to be a joy killer. All you have to do is to convey to the inquiring or urging gentleman that you think it's all kinda cheap and you'd rather not go in for that sort of thing.

TRIBUNE COOK BOOK

BY JANE EDDINGTON. Pork Souffle.

Some one in writing to me recently for a copy of my cook book wanted to know if the pork souffie recipe was in it, and if not if I would enclose a copy of that. Since clippings of this recipe have mostly been used up, and since the recipe makes a good summer dish, it probably will bear reprinting. At any rate, here it is:

Buy one pound of pork loin or get

Buy one pound of pork loin or get a shoulder piece without the bone-one pound of it. The loin is good because the fat has been so closely for this dish. Make the piece of pork immaculate and put with it one car-not, two sliced onions, some celery leaves, a green sweet pepper and any other seasonings that suit. The celery is important,

Put these in a cooking utensil—small boiler—and add four or five cups of cold water; bring to a boil slowly, cook gently one hour, skimming at the start, if necessary. Leave the pork in the liquor when it is done and cool the whole rapidly—that is, do not allow it to stand around tepid.

The pork so cooked gently should be as tender as possible.

For the souffle, put enough of the pork through the food chopper to make one cup. Strain the liquid in which the pork was boiled and take two cuts of it for a grayy. There two cups of it for a gravy. There to make a gravy to serve the tablespoons—mixing the flour first with two level tablespoons of butter and cooking the two together till

Cool, add to it the cups of cold Cool, add to it the cups of cold liquid and stir and cook over the fire until it thickens. Add the minced meat to this gravy with salt to tase, or the meat may have been salted at the end of the first cooking. A few grains of cayenne pepper are worth while and almost needed.

Stir into this mixture one or two locaters are volks then fold in two ears.

beaten egg yolks, then fold in two egg whites carefully, keeping the mixture as fluffy as possible. Pour the preparation into a buttered baking dish, sprinkle with bread crumbs and bake until it puffs. Serve immediately.

Raymond had been naughty all morning and his mother made him sit on a chair. A neighbor came in and saw him sitting there so quietly and she said, "Why, Raymond, how do you happen to be so quiet this morning?"

Bertle, the little boy next door to s, was sitting on our front porch

us, was sitting on our looking very lonesome.

"Where's your little playmate, Jackie?" I inquired.

"Aw, he got a spankin' this morning and he's always so good for a while after that I have to play by myself." was the disgusted reply.

My Dear Mrs. Bevans: Can a child are caring for is fond of stories, poems, and songs. Every evening he is read to or told stories to, and in a playful way we repeat poems and sing songs to him about different things which come up during the day. "For instance, one morning he short "For instance, one morning he slept little later than usual and on re-

sating Stevenson's 'A Birdie with a sllow Bill' he begged for it often and oon started repeating parts of it. lso, he is immensely interested in shadows, the moon, hammers, and many, many other things, so we re-peat poems and sing songs on these subjects and he asks for them again

"At no time do we try to teach him verbatim, but he often repeats part of the stories, poems, and songs as we are telling them. We always answer his questions intelligently and explain things he doesn't understand. He has a remarkable memory and selm has to be told anything twice.
"He even asks the meaning of

words he doesn't understand in stories being read or told to him. On being read 'The Old Woman and Her Pig' he interrupted the story to ask, 'What is that stile?' In 'Chicken Licken' he interrupted with 'What is a den?'
"Now lately he have begun to state." Now, lately he has begun to stutter slightly. We cannot decide whethit is just that he thinks faster

han he can talk, or if we are exposing him to more than his brain car He is healthy, getting plenty of outdoor exercise, sleep and rest, and nourishing food. He is of a nervous ition, but we try never to let

him become overtired or excited."

As the letter describes the situation, this little boy is not being overstim-ulated. But it is a little later than this, usually at about 3 years of age, that we feel a child is advanced enough in general development not to experience any nervous strain from these things. He is at the age where the memory for poems and jingles functions phenomenally. He is interfunctions phenomenally. He is interested in this whole new world and his tions should be answered. With this much slowing up, the slight stuttering, I think, can be disregarded at the present time He is coming into his full powers ch and he will probably out row it if he is not overstimulated. Previous experience is unnecessary, as we will train you in the work. It is essential, however, that you be articulate, aggressive, and willing to work; have a pleasing personality and make a good appearance.

The work requires adaptability and intelligence. Although not essential, we prefer applicants who have had some college work.

The earning possibilities at the outset are nominal but will increase through a salary and commission arrangement upon completion of the course of training, mounting to a point far above the average in a comparatively short time.

Apply by letter only, stating your experience, if any, and why you believe yourself qualified to fill this position. Give your age and telephone number.
